## Research Summary

---

The overarching objective of my research is to *ensure software correctness in complex and critical modern software systems* through **scalable program analysis** and **reliable software testing**. To achieve this, I **leverage interdisciplinary statistical methods**, such as *causal inference*, *biostatistics*, and *machine learning*, to analyze the dynamic behavior of software in operational environments. My work has been published in top-tier software engineering venues, including ICSE, FSE, and JSS, and I have served as a program committee member for leading conferences, such as ICSE, FSE, and ASE.

## Academic Positions

---

University of California, Los Angeles (UCLA)	United States
<b>Postdoctoral Researcher, Software Evolution and Analysis Laboratory (SEAL)</b>	Jun. 2025 – Present
Group head: Prof. Miryung Kim	
Max Planck Institute for Security and Privacy (MPI-SP)	Germany
<b>Postdoctoral Researcher, Software Security Research group</b>	Sep. 2022 – Jun. 2025
Group head: Dr. Marcel Böhme	

## Education

---

Korea Advanced Institute of Science and Technology (KAIST)	Republic of Korea
<b>Doctor of Philosophy, School of Computing</b>	Sep. 2016 – Aug. 2022
Advisor: Prof. Shin Yoo	
<b>Bachelor of Science, School of Computing</b>	Feb. 2012 – Aug. 2016
<b>Bachelor of Science, Department of Mathematical Sciences</b>	

## Publications

\*Each marker text contains the hyperlink to the corresponding paper.

## Grants and Fellowships

---

- Title: *Statistical Security Analysis for Large, Evolving Software*  
Funding Agency: CASA - Cyber Security in the Age of Large-Scale Adversaries  
Grant ID: DFG under Germany's Excellence Strategy - **EXC 2092 CASA - 390781972**  
Amount: Salary according to the remuneration group E 14 TV-L (full time, ~ €136,000)  
Duration: 2024.01.01 – 2025.12.31  
Role: Sole Principal Investigator (PI)

## Awards and Honors

---

- **Spotlight Paper Award**, 13th International Conference on Learning Representations (ICLR'25), 2025
  - Title of Paper: *How Much is Unseen Depends Chiefly on Information About the Seen*
- **Distinguished Artifact Reviewer Award**, 33rd USENIX Security Symposium, 2024

- **PhD Dissertation Award**, School of Computing, KAIST, 2022
  - *Title of Dissertation: Statistical Program Dependence Approximation*
- **2021 Naver Ph.D. Fellowship Award**: Awarded by NAVER Corp. to Ph.D. candidates who have published an outstanding research paper or have excellent publication performance, 2021
- Government-sponsored Scholarship, Ministry of Science and ICT of Korea, 2016 - 2022
- Government-sponsored Scholarship, Ministry of Science and ICT of Korea, 2012 - 2016

## Teaching Experience

---

### Lecturer

- Advanced Automatic Testing (Co-Lecturing with Dr. Flavio Toffalini and Dr. Yannic Noller), Faculty of Computer Science, Ruhr University Bochum Spring 2025
- MPI Reading Group on Software Security (Co-Lecturing with Dr. Marcel Böhme and Ardi Madadi), Faculty of Computer Science, Ruhr University Bochum Spring 2025

### Teaching Assistant

- Automated Software Testing (CS453), School of Computing (SoC), KAIST Spring 2019
- Artificial Intelligence Based Software Engineering (CS454), SoC, KAIST Fall 2018
- Introduction to Logic for Computer Science (CS402), SoC, KAIST Spring 2018
- Artificial Intelligence Based Software Engineering (CS454), SoC, KAIST Fall 2017
- Introduction to Logic for Computer Science (CS402), SoC, KAIST Spring 2017
- Special Topics in Computer Science (Search Based Software Engineering) (CS492), SoC, KAIST Fall 2016

## Advising and Mentorship

---

### Ph.D. Student

- **Ardi Madadi** (MPI-SP) Feb. 2025 – Jun. 2025  
Co-advised with Dr. Marcel Böhme on the statistical analysis of fuzzer benchmarking to ensure the reliability of coverage- and bug-based fuzzer benchmarking. A **full conference paper** where Ardi is the first author has been submitted to ICSE'26.
- **Danushka Liyanage** (Monash University, moved on to University of Sydney Postdoc, 2024) Nov. 2022 – Dec. 2023  
Co-advised with Dr. Marcel Böhme on extrapolating the coverage rate of the Greybox Fuzzing using the statistical model. A **full conference paper** where Danushka is the first author has been accepted to ICSE'24.

### Undergraduate Student

- **Jing Liu** (Shanghai University, moved on to MPI-SP Ph.D. student, 2025) Apr. 2024 – Jun. 2025  
Co-advised with Dr. Marcel Böhme on the LLM-based regression test generation for the software testing. A **full conference paper** where Jing is the first author has been submitted to ICSE'26.
- **Shreyas Minocha** (Rice University, moved on to Georgia Tech Ph.D. student, 2024) Feb. 2023 – Jul. 2024  
Primary advisor on the statistical information leakage analysis to suggest the accurate and safe information leakage estimator. A **full conference paper** has been accepted to ICSE'25.
- **Saeyoon Oh** (KAIST, moved on to FuriosaAI) Jul. 2020 – Apr. 2021  
Co-advised with Dr. Shin Yoo on the effective sampling of higher-order mutants for mutation testing. A **workshop paper** where Saeyoon is the first author has been accepted to ICST'21.

## Service to the Community

---

### Academic/Professional Service

- Organizing committee: SBFT'26, SSBSE'25 (RENE/NIER Track)
- Program committee: (Main Track) FSE '26, ICSE'26, QUATIC'25, FUZZING'25, LlanMER'25, CauSE'25, ASE'24, ISSTA'24, FUZZING'24, SCAM'24, ASE'23 / (Artifact Evaluation Track) ISSTA'24, ECOOP'24, USENIX Security'24, ICSE'24, ISSTA'23, ICSME'22, ICSME'21 / (Student Research Competition Track) FSE'24 / (Tool Demonstration Track) ISSTA'25, ASE'24
- Reviewer: TOSEM'25, TOSEM'24, TSE'24, IST'24, ASE'24, TOSEM'22, JSS'21, JSS'20 / (External) ICSE'24, FSE'24, ECOOP'24, ICSE'23, ISSTA'23

### Institutional/Departmental Service

- Early Career Researcher (ECR) Board, CASA - Cyber Security in the Age of Large-Scale Adversaries 2024 – 2025  
The ECR Board decides all funding allocations for the CASA Graduate School (CGS). The board has its own budget and the autonomy to dynamically adapt the programs to the changing needs of ECR members. Representing ECRs in CASA governance, the board organizes activities and meets quarterly to address priorities.
- Open Science Ambassador, MPI-SP 2023 – 2025  
As representatives of the institute, Open Science Ambassadors raise awareness and provide valuable information to their colleagues about Open Science practices. They meet annually, in person or online, to discuss strategies, participate in workshops, and evaluate the status of Open Science within and beyond the Society.

### Invited Talks and Presentations

---

- **Invited Tutorial: “*The Magic of Statistics for Software Testing: How to Foresee the Unseen,*”**  
18th International Workshop on Search-Based and Fuzz Testing (SBFT'25) Apr. 2025
- *Open Peer Review in ICLR'25*, Open Science Ambassador Meeting, Max Planck Society Feb. 2025
- *Guarantees in Software Security – 2nd part: Extrapolating Software Testing*,  
Fuzzing and Software Security Summer School, National University of Singapore (NUS) May 2024
- *Magic of Statistics for Software Testing: How to Foreseen the Unseens*, Korea University Jan. 2025
- *Statistical Program Analysis*, Korea Advanced Institute of Science and Technology (KAIST) Jan. 2024
- *Statistical Program Analysis*, Ulsan National Institute of Science and Technology (UNIST) Jan. 2024
- *Causal Program Dependence Analysis*, Sheffield Causality and Testing Workshop Sep. 2023
- *Statistical program dependence analysis*, Handong Global University Aug. 2022
- *Observation-based approximate dependency modeling and its use for program slicing*,  
Korea Conference on Software Engineering Jan. 2022
- *MOBS: Multi-Operator Observation-Based Slicing using Lexical Approximation of Program Dependence*,  
59th CREST Open Workshop – Multi-language Software Analysis Mar. 2018

### Research Experience

---

#### Software Security Group, MPI-SP

Sep. 2022 – Present

Postdoc

Bochum, Germany

- Working on structure-aware residual risk estimation to achieve more accurate and efficient software security testing – *Structure-aware Residual Risk*
- Investigating the reliability of coverage- and bug-based fuzzer benchmarking, focusing on the internal consistency of results and agreement across fuzzers/metrics – *Fuzzer Benchmarking Internal Consistency*
- Worked on unbiased estimation of the missing mass, probability, or expected number of newly discovered classes in an unknown multinomial distribution
- Worked on LLM-based regression test generation for software security testing – *Cleverest*
- Worked on applying biostatistics to information leakage analysis to suggest an accurate and safe information leakage estimator – *Statistical Information Leakage Analysis*
- Worked on extrapolating the coverage rate of Greybox Fuzzing using a statistical model – *Greybox Fuzzing Extrapolation*

- Worked on applying statistical methods to program analysis to overcome the scalability issues of static analysis – *Statistical Reachability Analysis*

**Computational Intelligence for Software Engineering Laboratory (COINSE), KAIST**    **Sep. 2016 – Aug. 2022**  
*Ph.D. Student*    *Daejeon, Republic of Korea*

- Worked on approximating the degree of dependence between program elements using causal inference – *CPDA*
- Worked on applying statistical models to observational data to approximate program dependence – *MOAD*
- Worked on inferring type information in binary executables using RNNs in collaboration with the National Security Research Institute
- Worked on classifying false-positive alarms from a static checker in a continuous integration pipeline using CNNs in collaboration with Samsung Research
- Worked on program dependence approximation using a lexical model on source code – *MOBS*

**Computational Intelligence for Software Engineering Laboratory (COINSE), KAIST**    **Mar. 2016 – Aug. 2016**  
*Undergraduate Research Intern*    *Daejeon, Republic of Korea*

- Worked on the amortized deep parameter optimization of GPGPU workgroup sizes for OpenCV.
- Accelerated the scalability of Observation based slicing (ORBS) by applying a code distance metric during the slicing.

**Programming Language Research Group (PLRG) Lab, KAIST**    **Jul. 2015 – Feb. 2016**  
*Undergraduate Research Intern*    *Daejeon, Republic of Korea*

- Developed a source code translator from C# to C++ with F#.
- Developed a frontend of Scalable Analysis Framework for ECMAScript (SAFE), a Javascript static analysis tool.
